Paradime shift in discovery & secretion of biosimilars via path breaking innovation

Invented Radha108 Nano Peptides extracted from Bovine colostrum that naturally produces biosimilar like Cytokines (Interleukin I & Interferon) by secretion from Cytotoxic T- cells of the innate immune system, which was increased by 5 times by of Radha 108 Nano Peptides that get absorbed in the blood through buccal mucosa & crosses the Blood Brain Barrier. Radha 108 act on pituitary gland that in turn promotes differentiation of B cells, maturation of macrophages and monocytes & stimulates production of cytokines IL-1 to IL-11, TNF- α , INF- γ & maturation of immature thymocytes into either helper or suppressor T cells that helps building body's immune system strongly to fight any infection and immune disorders like Asthma, Allergy, URTI, Carcinomas and Type 2 diabetes saving hundreds of Billions of \$ that are spent in treating such ailments with little or no efficacy. Radha 108 Nano Peptides SEQ ID 1-8 extracted from Bovine Colostrum (with the Granted US Patent No. 9,249,188 & 8,518,454 B2) consists of ELVPGVPRGTQL (DNA-binding Protein Inhibitor ID -3), VAIQHMIKKLR (Epstein - Barr virus induced gene-2), LPQEVLNENLLRF (Alpha S1- Casein), RLNARMAELR (S-adenosylm ethionine synthetase isoform type -1), SSLQVLNMSHN(Toll- like receptor -4), EYQELMNVK (Keratin type II cytoskeletal 59kDa component IV), VDTLNDEINFLR (Keratin type II cytoskeletal 7), DGIVNENLAER (Ribonucleoside - diphosphate reductase small chain). Thus Radha 108 Nanopeptides stimulates the secretion of biosimilar (wide range of Cytokines like Interleukins, Interferon etc) that are very effective in treating all viral & immune disorders like HIV, Swine flu, Allergy, Asthma, Arthritis, Diarrhea, Fever, Fatigue-Malaise, Anemia, Endometriosis, cold & Flu by playing a Crucial role.

Biography

Pawan Saharan has MS in Life Sciences (JNU); PhD in Medicine (WVU) & Post Doc (Stanford University). He has several International Publications/Presentations including in Top Scientific Journal, Nature. He was nominated for several Global Awards including New Drug Discovery Programme of Department of Science & Technology (GoI) funded US\$ 3 million grant and the best US Scientist Award by AAAS, Washington DC. He has been CSO & CEO for large MNC & founder of Biomix Network Inc. USA & India.
