Cancer cured by bio electron's laser acupuncture: New advanced technology in medicine by bio electron's photons special circuit

Nick Kostovic

Kostovic Acupuncture by bio Electron's Laser Corp, USA

The author for the first time in recorded history has eliminated magnetism from regular electromagnetic electricity. He also created the next six steps described below. He did this by developing a proprietary way of reversed current (RC) to create what bio electricity is. The device he created is called the Kostovic BioTechnological Energizer, K-BTE medical laser device. First, his center has successfully developed special current circuit and canceled magnetism from electromagnetic electricity. Second, this device extracts bio electron photons from H₂O electric fluid by wire and wirelessly. Third, while using the K-BTE device therapist has absolute control of speed/frequency of these released and enriched bio electron's photons. Fourth, bio electron's photons are converted into the strength of micro or nano amperes allowing the bio electricity to softly penetrate into the brain or any other physical organ with zero harm to the healthy cells. Fifth, in the process of extracting bio electron's photons from the electric fluid, it can include transference of hundreds of different natural acids as well as amino acids. Each biological agent (BA) is capable to transfer three to six different natural and amino acids, by enriched bio electron's photons. Sixth, these enriched bio electron's photons are wirelessly transferred through olive oil coating on the skin enabling the bio electricity to softly penetrate and bio electron's photons always penetrate softly on the skin surface deeply and efficiently targeting the specific ailing human tissue. This process is always skillfully directed into the body with the very gentle frequencies of micro and nano amperes allowing zero risk of negative consequences.

Notes:
