

International Conference & Exhibition on
Cancer Science & Therapy
15-17 August 2011 Las Vegas, USA

Dr. John Thompson

University of Waterloo, Canada. Senesco Technologies Inc., USA

Dr. Thompson received his PhD from University of Alberta and he is professor of Biology and Associate Vice-president, Research at the University of Waterloo, his research interests include Biochemistry and molecular biology of programmed cell death: the molecular basis of membrane deterioration in senescent and aging

tissues; comparative aspects of senescence and stress including the role of hormones and the involvement of free radicals; functional genomics of senescence and apoptosis. He is the Chief Scientific Officer for Senesco Technologies Inc., USA and a Fellow of the Royal Society of Canada.
