April 15-16, 2019 | Amsterdam, Netherlands

## LEO based satellite IoT services: next gen IoT connectivity for the world

The presentation will consist of :

- 1.An overview of the satellite-iot operators
- 2.Focus on the new space Leo sat-iot players
- 3.Market opportunities for Sat-IOT.

### Biography

Hiber LEO satellite IoT constellation that is going to offer low cost low power IoT connectivity on a global scale. In 2018 He provided a number of presentations giving an overview of current and new satellite-IoT connectivity providers (e.g. during the WMO Meteo Tech conference in Amsterdam). Emphasis was there on the launch of a number of LEO based systems end of 2018. Now in 2019 however these systems are on the verge of becoming operational and the idea is to provide an overview of the running services these systems provide alongside existing sat-iot operators
