October 20-21, 2014 DoubleTree by Hilton Baltimore - BWI Airport, USA

*Thomas J Baker*

*Baker Associates-International Consultants, USA*

## Biometrics and privacy

Far from being a threat to privacy, biometrics can help guarantee the privacy of an individual. This includes not only one's personal financial data, but one's political rights as well. In fact, human dignity itself is protected, enhanced, and more clearly defined by the application of biometrics. All humans share common traits, in fact, a common ancestor while at the same time every human is a unique individual. Biometrics is a tool to help us understand this dichotomy and to protect and grantee each Individual's unique identity.

## Biography

Thomas J Baker is an international law enforcement consultant. His background includes 30 years of management, investigative, and crime prevention with the FBI. He has extensive experience with police management and training issues, having served as a management instructor at the FBI academy in Quantico, Virginia. He holds a Bachelor's degree from Fordham University and a Master's degree in Public Administration from the John Jay College of Criminal Justice. He successfully completed the Senior Command Course at the Police Staff College, Bramshill, England. He has been published in numerous professional journals internationally. Currently, he advises Law Enforcement agencies in both the US and worldwide on innovations in forensics, communications, and identification systems. He represents and interprets law enforcement's interests and needs to corporations and universities. He is an active member of the International Association of Chiefs of Police (IACP), the National Academy Associates, the National Executive Institute Associates, the International Association for Identification (IAI), and the Society of Former FBI Agents.
