

3rd International Conference on **Nephrology & Therapeutics**

June 26-27, 2014 Valencia Conference Centre, Valencia, Spain

Management of acute renal failure

Abdirazak Abdillahi Sh. Ibrahim

Jordan University of Science and Technology, Jordan

Acute renal failure is a common condition, frequently encountered in both community practice and hospital in patients. While it remains a heterologous condition, following basic principles makes investigation straight forward, and initial management follows a standard pathway in most patients. This presentation gives the advices on therapeutic strategies, including those in special situations, and should help the clinician in deciding when to refer to a nephrologist, and when to consider renal replacement therapy.

Biography
