

7th International Chronic Obstructive Pulmonary Disease Conference

October 22-23, 2018 | Rome, Italy

Lyubima Despotova-Toleva

Plovdiv Medical University, Bulgaria

The road to future: Successful scientific projects and teams

The workshop is targeted to medical doctors, researchers, university teachers and other academic staff as well as for people from so called eligible organizations in Horizon 2020 and other programs. Students and PhD students are also welcome. The main goal is to bring together professionals who are interested in scientific and educational projects to elaborate high quality project proposals and to win project grants. The key tasks are focused on: formulating a modern cutting-edge science ideas to be studied and proved, finding and organize appropriate teams of researchers capable to carry out the project according to the highest scientific standards and team management, project and budget planning, administrative issues. Practical examples for good already sponsored projects (finished and still running). Hopefully, this workshop will contribute to a successful project proposal/s in the field of COPD and related topics.
