Sperm DNA fragmentation in recurrent ICSI failure

Conventional semen analysis remained the only routine diagnostic test for male infertility, despite the lack of capability in discriminating infertile from fertile men, Up to 40% of infertile men have semen parameters within normal reference ranges, semen DNA fragmentation provides more detailed information than conventional semen analysis.

Biography

Ali Metawie has completed his PhD from Suez Canal University. He is the Head of the department of Enjab IVF centers in Portsaid, Egypt, a premier research organization.
