

International Meeting on

# Clinical Case Reports

April 18-20, 2016 Dubai, UAE

## Interesting pediatric dermatology cases from the department of dermatology at King Fahd University Hospital

**Iqbal A Bukhari**

University of Dammam, KSA

**Aim:** To present five interesting competitive pediatric cases rarely seen in the dermatology practice and discuss their management with highlight on the literature.

**Case-1:** Dermatofibrosarcoma protuberans at an unusual site in a 9-year-old child which was the location of a previous central venous line insertion in the left supraclavicular area. A complete excision of the tumor with a wide surgical margin of 3 cm of visibly uninvolved tissue was performed.

**Case-2:** Naxos disease is an autosomal recessive genodermatosis characterized by palmoplantar keratoderma, woolly hair and cardiomyopathy. We describe an early case of Naxos disease in a Saudi child and we briefly review the literature of this disorder.

**Case-3:** Panniculitis in Niemann-Pick Disease is a condition characterized by the recurrent appearance of inflammatory nodules in the subcutaneous fat. In this report, an infant affected with Niemann-Pick disease and recurrent lobular panniculitis will be discussed.

**Case-4:** Familial cutaneous collagenoma is an inherited connective tissue nevus which presents with asymptomatic symmetrically distributed skin nodules on the trunk or upper limbs. Here, we describe a case of a 12-year-old girl with collagenoma affecting the lower back.

**Case-5:** Post vaccination Morphea has been occasionally reported in the medical literature. In this report we add to these few cases which were related to Hepatitis B vaccination.

### Biography

Iqbal A Bukhari is currently a Professor and Consultant Dermatologist with more than 25 years of good experience in many dermatological diseases and their management. Her special interests include laser therapy, phototherapy, dermatopathology, cosmetic dermatology and study of genetic diseases. She has many publications in various international medical journals.
