Purpose: This study was done for the content analysis about the experiences and needs of donors and recipients.

Methods: Convenience sampling was done total 20 donors and recipients, personal interview was done by using a smart-phone and the text was recorded and fully transcribed, then the full text was analyzed into 4 categories.

Result: The 4 categories are motivation, aspects (duration, amounts, feeling, difficulties, satisfaction), knowledge, and demands including education, operational aspects.

Conclusion: The donors and the recipients want the community based human donor milk bank be established and operated, for this the public relations for the increase the public awareness is prerequisite, providing information and educational supports from the nursing care providers are needed generally. This work was supported by the National Research Foundation of Korea(NRF) grant funded by the Korea government(MSIP) (No. 2015R1A2A1A15056046)

Keywords: Human milk bank, human milk donor, human milk recipient, categorical content analysis
