Medical astrology: A perspective on your health through an ancient science

Rakesh Sharma

Rakesh Sharma, Wright State University, USA

Astrology is an ancient science that understands and evaluates the positions of the signs and planets within each house at the time of our birth, which profoundly affect every aspect of our life. This includes our physical, mental, and emotional health. The specialized branch

of Medical Astrology focuses on the health effects of the stars and planets at the time and location of our birth. As I have studied this science since 2012, I have learned that through Medical Astrology diseases can be diagnosed early, with great accuracy, a prognosis can be given, and treatment options can be judged. The most important factors in Medical Astrology are houses, planets, and signs. The combination of the twelve houses and the influence of the planets and signs within those houses make

up the basis for determining the types of diseases, prognosis of diseases, possible cures, and the time a disease may occur and be cured.

Biography

Dr. Rakesh Sharma has completed his Doctorate of Medicine from Wright State University in 1996 at the age of 25. He went on to complete a residency in Internal Medicine. He was board certified in 1999 and recertified in 2012. He has been in private medical practice for over 20 years in multiple settings. He was the CEO of a medical practice in Ohio. He was Medical Director of Reception and Medical Center Hospital in Florida. In 2012, he began an extensive study of Medical Astrology. Over the years, he has analyzed and studied hundreds of astrological charts.
