TRAUMA & CRITICAL CARE

February 22-23, 2018 | Paris, France

Julin F Tang

Zuckerberg San Francisco General Hospital and Trauma Center, USA

Ultrasonography in Acute Care Medicine

The use of portable ultrasonic echocardiography has become a powerful tool in the trauma, critical care and perioperative setting in the hands of non-cardiologist that can provide non-invasive, real-time information that will transform the practice of medicine in time-critical situations. I will present a case series of application of ultrasonography in acute care medicine with findings that affected perioperative management. This is a presentation from a single institution. A well-designed prospective study is needed to validate our findings and improve patient's outcome.

Biography

Julin F Tang is an Anesthesiologist/Intensivist in San Francisco, California and affiliated with UCSF Medical Center and San Francisco VA Medical Center. He is boarded in Anesthesia and Critical Care Medicine. He has received his Medical degree from China Medical College, Taichung, Taiwan in 1978. His clinical research interests involved in the understanding of hemodynamics and pulmonary physiology in both anesthetized and intensive care unit patients.
