

2nd International Conference and Expo on

Ceramics & Composite Materials

July 25-26, 2016 Berlin, Germany

Ajay Kumar Mishra

University of South Africa, South Africa

Workshop Contents for Ceramics-2016 on “Nanoceramics”

This workshop will be mainly focused on various nanoceramic materials and its applications. This will generate a common ground for the researchers to share ideas. The growing interest in the area is due to the presence of excellent materials with unusual material properties through manipulating the length scale in nano range. This results in better performance of materials with new applications in various areas. It is well known that any new research and breakthrough in such emerging research area needs focused discussion on what potentially can enable new ideas and also in networking by international meeting in the form of workshop. Workshop may lead to structure-property relationship to nanoceramic materials. In the technical session various aspects of nanoceramics at the research level on production and various other applications will be discussed together with the discussion with eminent scientists.

Biography

Ajay Kumar Mishra has completed his PhD from Delhi University and Post-doctoral studies from University Free State and University of Johannesburg at the Department of Chemistry. He is also working as “Adjunct Professor” at Jiangsu University, China which is a well known University in China. He has published around 100 papers in reputed journals and has been serving as an Editorial Board Member of repute.
