

Age old stem cell theory

Sindhura VL Sanagavarapu¹, Vidya Rani.S¹ and Ch. Ravinder²

¹PG scholar, Dr B.R.K.R Govt Ayurvedic College, India

²Reader, Dr B.R.K.R Govt Ayurvedic College, India

The basic concept of stem cells is an age old concept described for the first time in Ayurvedic Classics. While describing about Organogenesis acharyas like Susrutha, Vagbhata and Haritha gave vivid description of today's stem cell theory. The present poster focuses on the Ayurvedic conceptual basis of stem cell theory. Also latest research on haemopoietic cells giving rise to liver epithelium strengthens the concept of ayurveda that rakta evolves into liver and spleen. The aim of the poster is to grab the attention of the scholarly world regarding Ayurvedic concept of Stem cell theory and support further research.
