

International Conference on

# Restorative & Alternative Medicine

October 24-25, 2016 Chicago, USA

## Corey Schuler

*Integrative Therapeutics, USA*

### Advances in intestinal hyperpermeability and SIBO

Integrative practitioners are increasingly accustomed to diagnosing and treating small intestinal bacterial overgrowth (SIBO) and intestinal hyperpermeability as clinical entities. Both of these conditions are at the heart of many other known and named conditions. However, despite our ever-increasing understanding and appreciation, both SIBO and intestinal hyperpermeability require highly complex protocols, are often difficult to resolve, and prone to recurrence. Participants will learn to work with patients for whom the elimination diet has failed, patients who have increasingly difficult symptoms to manage, and those who cannot tolerate conventional approaches. The focus of our discussion will be on the dietary management of moderate to severe gastrointestinal and digestive impairment.

### Biography

Corey Schuler is the Director of Clinical Affairs for Integrative Therapeutics. He is a Certified Nutrition Specialist, Licensed Nutritionist, Registered Nurse and Fellow of the American Association of Integrative Medicine. He also has earned degrees in Chiropractic Medicine and Phytotherapeutics. He has a private integrative medicine practice in Hudson, Wisconsin. He is an Adjunct Assistant Professor in School of Health Sciences and Education at New York Chiropractic College. He is on the Board of Directors for the International Probiotics Association and an Advisor at the Functional Medicine University.
