

2nd International Conference and Exhibition on Traditional & Alternative Medicine

August 25-26, 2014 DoubleTree by Hilton Beijing, China

Diagnosis of spiritual illnesses

Arman Aghwani
IGet Healthcare, India

Aim: To prove that spiritual illnesses can be easily diagnosed and treated.

Method: We use modern paranormal investigation instruments on 100 effected patients of suspected spiritual malfunction and treated them with traditional Islamic medicines such as recited kalonji oil, olive oil, Sanna makki, honey and Hijama therapy.

Result: We found that with the help of modern paranormal investigation instruments we got extraordinary results.

Conclusion: With scientific diagnosis we can diagnose and treat these illnesses which can't be cured with either conventional medicine.

Biography
