

International Conference on

Astrophysics and Particle Physics

December 08-10, 2016 Dallas, Texas, USA

Stellar sail, planet re-climate and homeland defense

Edwin Zong^{1,2}¹Oasis Medical Group Inc., USA²Laser Neutrino Annihilation Synergistic Applicator LLC, USA

Mars's weak electromagnetic field (E/M) is the reason why it has been losing its atmosphere/oxygen much faster than earth, observed by NASA study. Therefore, the first step for planet-flipping requires cosmos reconstructive engineering of its thin atmosphere (hostile to lives), which can be accomplished by growing its electromagnetic field. Such said approach isn't a theory, it is a fact. The world's electric production has almost tripled in the last century. Along with earth's inherited motion, the electrification of our home planet has increased its E/M field, which causes global re-climate/gas retaining or warming. It is evidenced by the tremendous increase of the Earth's lightning strikes and storms/clouds in the past twenty years. The E/M force follows Newton's third law, which is clearly supported by experiment as well. To utilize its force in cosmos, the author develops your budget trip and economic lodge/landing system with "aerospace stellar sail and electromagnetic topography establishment" or Asset E©. Asset E will be the cosmos version of an affordable commercial airline and utility company. The Asset E can be easily modified for asteroid mining/diverting and man-made flying objects (harmful) recycling. The code of cosmos conduct is expected to be an extension of earth's practice. To ensure our home planet's safety, I will discuss the necessity for globalizing a medical/humanitarian code-a version of 5150 in California, along with its physics for enforcing it.

Biography

Edwin Zong has completed his Medical Degree from Shanghai University of Chinese Medicine and New York College of Osteopathic Medicine. He has completed his specialty training in Internal Medicine from KMC/University of California, Los Angeles. He is the Medical Director of Oasis Medical Group Inc., and Laser Neutrino Annihilation Synergistic Applicator LLC. He has published more than 20 papers in reputed journals.
