# STROKE AND NEUROLOGICAL DISORDERS

November 12-13, 2018 Istanbul, Turkey

## The power of the happy brain

**Suzane Lousse**

Therapist expert in neuroscience, Paris

During our life, we lived all at least once the stroke of a person of our entourage. The man improved the emotions and the feelings thanks to an extraordinary specialisation of his brain. According to the degrees of handicap of the subject, the regard of oneself and the emotions are impacted. It is one favourable moment to put the good questions. A question can go up to 850 thoughts in the direction of the question. How to put moving the system of thought? Even if it is complicated after an accident, one can always act by making new trainings. We will learn how the neuroplasticity is related to the experiment.
