

Annual Conference on
GREEN CATALYSIS AND SUSTAINABLE ENERGY
November 15-16, 2018 Dubai, UAE

Anita Nouri

Green Energy Solutions & Sustainability LLC, UAE

Regional waste management strategies—opportunity for sustainable development LFG power generation

Biography

Anita Nouri is a Founding Partner and CEO of Green Energy Solutions & Sustainability LLC a Dubai based Waste Management Company that was established in 2011 to support the development of sustainable waste management and landfill gas projects in the region. The flagship project, Al Qusais landfill is under the jurisdiction of Dubai Municipality, and is currently the only landfill in the Middle East to produce power from landfill gas. "As entrepreneurs we are proud of this project, our goal is not to create more landfills but to optimize the existing ones and create a source of power. Al Qusais Landfill project is registered as a CDM project with the UNFCCC project #8269. Green Energy Solutions & Sustainability LLC has a signed ERPA with Norway that is able to monetize the Carbon Credits. In January at the World Future Energy Summit, a Contract was signed with Tadweer Center of Waste Management in Abu Dhabi to implement a Landfill Gas to Energy project that will be operational by the end of 2018. "The target is Zero Waste and included in this is our target to utilize the existing landfills to supply a source of power." Anita Nouri has been a speaker at many events in the region and has achieved several awards for the work she has done. GESS is targeting landfills and providing environmental solutions.
