

International Conference on

Quantum Mechanics and Applications

July 20-21, 2018 | Atlanta, USA

Why quantum gravity will not be grasped: Permitting religious concepts, countering physics puzzles

Housam Safadi
Safadi Bureau, Syria

What is wrong if an authorized system governed our universe? Each component of which has its own rules, laws and special areas of application. Two matter components are shaping our universe, visible and dark invisible matter. I suggested their function in the attached figure (Fig.1). Gravity, which I will discuss in this paper is the third component. It has its own properties and activities. Gravity, we suggest, never a boson or particle. So gravity does not involve particle-wave duality. That is, humbly, why we are unable to write quantum gravity, it is either GR, the curvature of space-time or gravitational waves. Scientists attempt to grasp quantum gravity by string theory, where "string theory" meets the conditions to be a stable theory of quantum gravity and fit the properties of gravitons. I demonstrate the nature of String Theory and its relations to Abrahamic religions scene in my book "String Theory Abrahamic Religions". This concept is one of the crucial orientation of my paper. In this paper, I will prove, by opposing scientific facts face to face with Abrahamic religious concepts, that gravitons of gravity i.e. gravitational waves are the Scriptures' Angels. There are many facts which makes me consider gravitational waves and gravitons as Scriptures' Angels, some of them are: (a) Graviton in gravity, is a particle which has not be authorized. (b) Gravity is an emergent phenomenon. (c) Gravity includes the symmetries of space-time. (d) Gravity is difficult to test. (e) Gravitons are a special form of closed strings that have no mass, their spin is 2, and they exist in the form of closed oscillating strings. String theory requires that these closed strings be present, even though there may or may not be open strings. (f) We cannot open closed strings just because that its resource and structure is different from other forces. (g) Gravity can surpass all extra dimensions. Angels can move between the Heavens (string theory branes). (h) Gravitons can reach the seventh Heaven, Its equations can be written no matter how many the dimensions are. (i) Gravitons ridge, crown, and cirlet God's Throne forming supergravity in the 11th. M-theory. (j) Graviton cascade (virtual) is outside any kind of mathematical control to be imposed. Gravitational field can be understood as extrusion of other gravitons. We cannot follow up the consequences of all these gravitons. (k) Scriptures describe the waves' oscillations of gravitons as angels' wings. The wings gesture represent the motion of crest and trough of the waves (Fig.2)

Biography

Housam Safadi is the Manager of Safadi Bureau, a consulting agency in Damascus, Syria. He has his Master Degree in science from Kiev Polytechnic Institute in 1972. He is also an honored member of Syrian Engineers Syndicate and member of the Urban Modernization Programme (UMP) in the Arabic region. Housam Safadi is a lecturer at the University of Damascus. In return for his achievements, the Engineers' Syndicate offered him an honorary certificate highlighting "his efforts serving the engineering profession. Housam Safadi is not a professional physicist. He is not a cleric of any religion. He is physicist enthusiastic and fan. In his seventeenth, Housam went back to his beloved physics. He refreshed and developed his previous knowledge of modern physics. Crises in the Middle East forced him to restudy Abrahamic religions. He came up to understand modern physics and solve its puzzles through pure religious facts. He published two books as an outcome of his discoveries.
