

27<sup>th</sup> World Oncologists Annual Conference on

# Medical Oncology, Radiation Oncology & Surgical Oncology

10<sup>th</sup> International Conference on **Dermatology & Cosmetology**

December 07-08, 2018 | Chicago, USA

## Massimo Bonucci

San Feliciano Hospital, Italy

### The integrative oncology: The new way to treat cancer

When we speak about neoplasia we have the sensation of not having many opportunities to offer patients. Maybe if we think about conventional therapy, this might be correct. If instead, we evaluate the opportunity that is offered with integration, perhaps we will be able to have a more positive concept. Integrated oncology in the widest sense of the word is a method which is a broader approach in the oncological panorama: The use of natural substances and methods in combination with conventional cancer treatments help us obtain more results. We know about many substances which can give significant advantages when used in combination with traditional cures. Some works have given us several good examples: Aleo and Carboplatin, to name only a few. But we must not forget the traditional complementary cures: Acupuncture, Homeopathy, TCM. Acupuncture is one of the most widely used methods for decreasing the undesirable/side effects of antineoplastic drugs or for reducing pain. However scientific studies also confirm its indispensable and independent energizing effect as a cure for the patient. Integrated therapy in oncology is a valid aid for patients affected by neoplasia. Its use in clinical cases is by now a prerogative of ARTOI. In this work the therapeutical models/protocols which are studied and applied by doctors who follow teachings and practical applications of ARTOI such as herbal medicine, homeopathy, nutraceuticals, traditional acupuncture, and microsystems acupuncture techniques.

### Biography

Massimo Bonucci MD is Chief of Clinical Pathology and Surgical Pathology and Outpatient Oncology in San Feliciano Hospital, Rome, Italy; he is a member of IAP (International Academy of Pathology-Italian Division). For ten years he had collaborative experience with Dr. Nieper (late President German Society of Oncology); after he introduced the use and development of integrative medicine on cancer patients in Italy. He is Professor of the G. Marconi University "Centro Studi Scienza Della vita" in Rome, for Master in Integrative Oncology of the postgraduate program. He is Professor on the University of Chieti for Master in Integrative Oncology of the postgraduate program for the year 2017-2019. He wrote a book "Quello che mangi fa la differenza" who speaks about the integrative medicine and the nutrition. He organized from 2009 to 2018 the International meeting of Integrative Oncology in Rome. He is Visiting Professor at Zhejiang Chinese Medical University in Hongzhou, China.
