# **Physiotherapy & Physical Rehabilitation**

March 25-26, 2019 | Rome, Italy

## **Use of LLLT (Low Level Laser Therapy) in managing pain after fracture by healing the fracture**

**David IP**

Wellness Pain Centre, Hong Kong SAR China

The talk will start off with a general introduction of the principles of low-level laser therapy, the mechanism whereby it has healing potential of injured body cells and the mechanisms of stimulation of bone formation using this advanced technology. This will be followed by its clinical applications in clinical practice using real life examples.
