

WORLD PHYSICAL MEDICINE AND REHABILITATION CONFERENCE

November 12-13, 2018 Istanbul, Turkey

Outcome of program designed to evaluate the extent of benefit of the amputee from his prostheses in PAC-prosthetic center in Turkey

Ali Serhan

Physicians across Continents, Turkey

In order to follow up our patients in PAC-prosthetic center in Turkey, whose most of them were living in Syria and there getting back to the center to evaluate their prosthesis is difficult, so we designed a form to obtain that. The form in of 1 page, it has some questions, by which we can evaluate the benefit of the patient from the prosthesis. Also, we designed a computer program to inter this information and analyze the data. I wanted to share you the results.

Biography

Ali Serhan has completed his master's degree from Damascus University. He is the Director of Prosthetic Department in PAC-Turkey.
