## Explanation of pharmaceutical care of cardiovascular patients

Faezeh Sahbaeiroy<sup>1</sup>, Mohamad Pourzadi<sup>2</sup> and Ali Ramezankhani<sup>3</sup><sup>1</sup>Islamic Azad University, Iran<sup>2</sup>Khatamolanbia Hospital, Iran<sup>3</sup>Shahid Beheshti University of Medical Sciences, Iran

The main goal of pharmaceutical care is to provide effective services in the field of drug-related issues that ultimately leads to improvement of patients' status and increase in their quality of life. This qualitative study using three-step approach of the Strauss and Corbin (1998) was conducted with 20 participating patients of doctors, pharmacists and nurses semi-structured interviews. Total of 4508 basic codes were obtained at open coding step, the codes were overloaded based on their similarities and common points. Finally, 795 overloaded basic codes were created. In the next step, they were in the 152 classes and by frequent analysis, basic classes were reviewed and subsequently compared. Classes were merged together to create finally 48 classes. The data were re-examined in the axial-coded of similar integrated classes that have certain common features were formed of the 19 subclasses and then the classes that were around of an axis created the axial-classes, According to this process of five-axial classes which focus on causal-background conditions where the phenomenon happened, the strategies that were used to control the phenomenon, barriers and facilitators were obtained. The five main classes were as inadequate responsibility of pharmaceutical care, prioritizing treatment over prevention, non-patient-centered vision and pharmaceutical care with ignoring nurses. Description of story line and the final explanation method were used at selective coding step. Based on the findings of this study the main concerns of the participants were inadequate collective responsibility and inefficient management ultimately.

### Biography

Faezeh Sahbaeiroy has completed her PhD at Shahid Beheshti University of Medical Sciences, Tehran, Iran. She is the Nursing Deputy IAU. She has published more than 45 papers in reputed journals and has been serving as an Editorial Board Member of reputed journals.
