A survey study: Dengue may provide some antibodies help against fight with Covid-19

Background:

Corona cases are increasing rapidly in India but we have seen that people who have dengue have developed immunity to fight against corona, which helps them to fight against corona.

Materials and Methods:

A community diagnostic survey in an urban area practice area was conducted by Jodhpur, Rajasthan (India). A group of 100 dengue patients to survey their health status and socio-demographic factors. Information was collected regarding their current health status, condition etc. Data were analyzed by appropriate instruments.

Result:

There were 100 dengue patients in this survey. 69% of the study population was under 19-27 years of age and approximately 20% were over 28-40 years of age, 4% and 41-55 years old. . Women (43%) were (56%) less likely than men to have it. In the general survey, there was no corona infection after dengue.

Conclusion:

It was found in this survey that not all patients who have had dengue before have been infected with corona. We found in our research that most of the men and women aged 19-27 after dengue are not at risk of getting infected with corona and we can also say that some antibodies are formed in the body after recovering from dengue Which help fight against corona infection.

KEYWORDS:

Virus, Dengue, Covid-19, antibody etc.

Biography

Mr. Ashwin singh chouhan is a Ph.D. scholar at Department of pharmacy, B N College Udaipur and currently working as an Assistant professor at Jai Narain Vyas University Jodhpur Rajasthan. His research interests are "Nenorobotics, Clinical Pharmacology Studies, His published several research papers in national and international journals, Mr. Chouhan best experience of teaching line. Mr Chouhan has more than three years of teaching and two year research experience. He has represented India twenteen time as a speaker by presenting International Conference Articles and also received Best Research Paper ICTASEMP Conference Sponsor by Scopus Journal 2021.
