

31st Euro Dentistry Congress

June 20-21, 2022 | Paris, France

Aleem Rahman, Oral Health Case Rep 2022, Volume 08

Digital dentistry: Post covid dentistry

The Covid 19 Revolution:

- Perhaps the single biggest savior for 21st century dentistry
- The pandemic has forced us to focus:
- An affordable digital dental platform for every dentist

The Covid 19 Pandemic:

- A global catastrophe that triggered medical marvels not seen since Sir Alexander Fleming
- The SARS-CoV-2 genome consists of nearly 30,000 RNA bases
- The entire epigenomic map of The SARS-CoV-2 proteome and it's 200 mutations was sequenced in 27.7 hours.
- The importance of Computer Science and Artificial Intelligence in medical technology (CSAIL) was finally understood
- In less than 11 months, the world had 7 immunization protocols readily available to the general public

Traditional Dentistry:

- Patient requests a crown
- The dentists prepares the crown
- The dentists takes an analog impression
- The impression is sent off to the lab

How do we fix this?

Your crown is designed by a real Dentist. As oppose to someone not trained in tooth morphology or anatomy. The final design goes to milling machine.

Digital Dentistry is a Cup of Coffee, No polishing, No removing of high spots, perfect quality, fast and Efficient.

Welcome to the new age of Dentistry.
