Entrepreneurship Development: A Vital Parameter towards Professional Consistency

Abstract

In the present scenario of liberalization and Globalization, entrepreneurship development has been emerged as a well-defined and key area in terms of professional consistency. It enables us to establish real time awareness that further helps to deliver professional outcomes effectively and profitably. Apart from this, entrepreneurship development always ensures about the alignment of individual efforts by analyzing the results of the same. The purpose of the study is to correlate entrepreneurship development with reference to the professional consistency and to highlight the long-lasting impact of entrepreneurship development in terms of professional sustainability and stability. The research methodology used in this study includes both primary and secondary data including some personal interactions with leading entrepreneurs. Findings & conclusions: Entrepreneurship development emphasized with professional consistency directly leads to the nation building in terms of future economic growth. It allows full transformation of one's potential into professional implications.
