November 07-08, 2019 | Frankfurt, Germany

Tip refinement in rhinoplasty with seg and subdommal graft combination

Pedro Nery Bersan

Hospital Madre Teresa, Brazil

Aims: To offer a new tool set for stabilizing and producing well shaped and long term satanding tips in virtually any rhinoplasty patient.

Methods: The use of the combination of a shorter-than-usual septal extention graft and a complementary subdommal graft can offer both good suport for the nasal tip and a smooth and rounded shape both in thick and thin skin patients. It can also serve as a resource for secondary rhinoplasties and in those patients where cartilage availability is restricted in therns of lenth and strenth.

The SEG acts as the necessary suport for the tip and the subdomal graft provides smothness and stability.

Results: Almost any patient can benefit from it, and the tecnique has been proving itself very useful in primary rhinoplasties, specialy in thick skin patients, and in all kinds of secondary rhinoplasties.

Long term stability and shape of the tip was achieved in all patients where the combination was used.

Conclusions: The combination of a shorter septal extension graft and a well positioned and trimmed subdomal graft has been proving itself to be a valid alternative for combining suport and shape to the tip in all kinds of rhinoplasties

Biography:

Pedro Bersan is the Doctor by the Federal University of Minas Gerais (UFMG) Plastic Surgeon, Specialist Member of the Brazilian Society of Plastic Surgery (SBCP) Plastic Surgeon of the Team of the Mother Teresa Hospital Preceptor of the Medical Residency of the Hospital das Clinicas of UFMG Co-author of the Chapter of Burns of the Clinical Emergency Book of the HJXXXIII Fellow of Advanced Rhinosseptoplasty of Dr Enrico Robotti (Mildo, IT) Specialist in Facial Plastic Surgery and Rhinoplasty with Rod Rohrich (Lift-and-Fill Facelift) and Dr Sam Hamra - Composite Facelift (Dallas, USA) Internship in Secondary Rhinoplasty and Migraine Surgery with Dr Bahman Guyuron (Cleveland, USA) Member of the European Rhinoplasty Society.
