

# **Brief Interview with Dr. Dongfeng Wu**

## **(Executive Editor)**

### **Journal of Biometrics & Biostatistics**

**1. How many years have you been associated with the current research?**

About 15 years.

**2. What is the research topic you are working on now?**

Probability modeling and inference of cancer screening.

**3. What are attributes for a quality article?**

Original ideas, concepts and methods, breakthrough in solving open problems.

**4. Do you have any research funding (NIH or other national funding) now?**

Not now. I'm applying.

**5. When did you become an editor of OMICS Journal?**

Since it started in 2010.

**6. What is your greatest career accomplishment?**

30 years.

**7. How does the published scientific content assist the potential researchers?**

Researcher need to know what results are available when they do their own research.

**8. What is the purpose of serving as an editor?**

Broaden my view and benefit the field of biostatistics.

**9. Do you have any patents?**

No.

**10. Have you contributed any editorials or papers (any types) to OMICS Journals in the past two years?**

Yes.

**11. Do you plan to contribute any editorials or papers to OMICS Journals in the next year?**

Yes.

**12. How would you define your experience with OMICS Group?**

It is positive and mutually beneficial.

**13. Your opinion on conducting Editorial Board meetings at related Conferences?**

It's good for the journal, also good to get to know each other.

**14. Would you recommend OMICS to your friends or colleagues?**

Yes.

**15. How do you differentiate Journal of Biometrics & Biostatistics with other journals in the field?**

It's hard to say at this point. It is compatible with other open access journals. But compare with flagship journals of the biometric/biostatistics society, it needs to improve its impact by publishing high quality original research articles.
