

2020 Announcement of 7th International Conference on Wireless and Satellite Communication (ICWSC 2020) May 21-22, 2020 | London, UK

Lie-Liang Yang

Professor, School of Electronics and Computer Science, University of Southampton, UK, E-mail: lly@ecs.soton.ac.uk

[7th International Conference on Wireless and Satellite Communication \(Wireless Conference 2020\)](#) is going to become a huge platform to all the Engineers, Researchers, Innovators, Scientists, Professors, Academics students, and the expertise in the field of Wireless to share and explore their views on their research and case studies with the global experts. The conference is going to be held during May 21-22, 2020 at London, UK which revolves around the theme "Future of Communication in Today's World".

After the successful completion of several "International Conference on [Wireless and Satellite](#) Communication", the Conference Series llc Ltd is glad to include another international conference in the series. The conference is tilted as "7th International Conference on Wireless and Satellite Communication (ICWSC 2020)" the conference will be held on May 21-22, 2020 at London, UK.

This 2020 Wireless Conference will give you exemplary experience and great insights in the field of research.

According to this research report, the global market for Wireless Communication is projected to show a robust growth of 6.5 per cent in the Compound annual growth rate (CAGR) during 2019-2028.

The research report on Global Wireless Communication Market 2019 keenly analyses significant features of the industry. The analysis servers market size, latest trends, drivers, threats, opportunities, as well as key market segments. It is based on past data and present market needs. Also, involve distinct business approaches accepted by the decision makers. That intensifies growth and makes a remarkable stand in the industry.

The report segregates the complete market on the basis of key players, geographical areas, and segments. Wireless communication refers to the communication or transmission of information over a distance without requiring wires, cables or any other electrical

conductors. Wireless communication is one of the fastest growing industries in the business world as it is helpful in sending and receiving messages through electronic devices and a wireless medium.

The fifth-generation of mobile technology (5G technology) is expected to cater to the demand and business frameworks needed by and beyond 2020; but it is not without its disruptions. In addition to driving a connected society, 5G wireless technology will bring about socio-economic transformations through productivity, sustainability and well-being. Mobile 5G seems to be on course to be the next big thing in the global digital connectivity ecosystem.

The main driver of 5G is the ever-increasing demand for an enhanced mobile internet experience, clubbed with smartphone adoption among users. 5G technology will address rising bandwidth requirements, demand for advanced application services and improved acceptance of the Internet of Things (IoT).

However, mobile 4G LTE will dominate in terms of volume for at least the next ten years. According to a Netscribes research, the global 5G market is forecast to grow at a CAGR of around 97% over a five-year period and will reach a value of USD 251 billion by 2025.

Wireless 2020 Conference will discuss on the topics such as 5G and Beyond, Telecommunication, [Wireless Communication](#), Internet of Things (IoT), Technology for Wireless, Mobile and Wireless Network, Satellite Communication.

EEE & Engineering Conferences going to be held during January, 2020 to December, 2020 at various cities in Europe (London, Barcelona, Madrid, Valencia, Rome, Milan, Berlin, Frankfurt, Vienna, Zurich, Dublin, Edinburgh.... and Many More....!!!

In recent years, the market for wireless has seen significant growth directly on the back of the increasing number of technologies.
