

2020 Announcement of Bacteriology & Applied Microbiology Conference August 26-27, 2020 | Singapore City, Singapore

Anna Afinogenova

Professor and Head, Laboratory Center, Saint Petersburg State University, Saint Petersburg, Russia, E-mail: spbtestcenter@mail.ru

[Bacteriology](#) is a complex, chronic illness requiring continuous medical care with multifactorial risk-reduction strategies beyond glycemic control. Ongoing patient self-management education and support are critical to preventing acute complications and reducing the risk of long-term complications. Significant evidence exists that supports a range of interventions to improve diabetes outcomes. [Applied microbiology](#) is a scientific discipline that deals with the application of microorganisms and the knowledge about them. Applications include biotechnology, agriculture, medicine, food microbiology and bioremediation.

[Bacteriology Asia Pacific 2020](#): witnessed an amalgamation of peerless speakers who enlightened the crowd with their knowledge and confabulated on various new-fangled topics related to the field of diabetes and endocrinology with namely **Anna afinogenova**, St. Petersburg State University Russia.

With the successful completion of Bacteriology and Applied Microbiology 2019 we are glad to announce our upcoming “**13th Annual meet on Bacteriology and Applied Microbiology**” is going to be held during **August 24-25, Singapore**. The Conference will be organized around the theme “Discovering the New Challenges in the field of Microbiology. [Bacteriology Asia Pacific 2020](#): invites all Academic Scientists, Leading Endocrinologists, Surgeons, Oncologists, Radiation Therapists, General Physicians, Dieticians, Primary Health care specialists, Internists,

Pharmaceutical Industrial Delegates, talented young scientists, and student communities across the globe to attend Singapore. Bacteriology and Applied Microbiology conference under a single roof where networking and global partnering happens for the acceleration of future research.

Bacteriology & Applied Microbiology size was valued at over USD 24.3 billion in 2017 and will exceed USD 675.2 billion with 7.9% CAGR from 2017 to 2024. At Global Market Insights, It is a unique blend of primary and secondary research, with validation and iterations, in order to minimize deviation and present the most accurate analysis of the industry. Rising demand of new technologies will drive the biotechnology industry size. we've seen tremendous growth and change in the industrial diagnostics industry, particularly in the food safety sector expertise in all aspects of the market, plus extensive experience in business management, strategy development and international business, microbiology test volumes, market values and methods used by food producers around the world, based on detailed interviews with more than 450 food production facilities in America, Europe and Asia, including Japan.

The “**12th Annual meet on Bacteriology Asia Pacific 2020**” was scheduled during September **23-24, 2019** at **Tokyo, Japan**. The conference was initiated with the honorable presence of the Keynote forum. The list includes:

- **Title:** Influence of antiseptics and their combinations on microbial DNA and biofilms Anna G Afinogenova, St.

Petersburg State University, Russia by Aditi Chauhan, Panjab University, India.

- **Title:** Methicillin resistant Staphylococcus aureus: A molecular insight of the predominant clones causing central nervous system infections, an experience from a Tertiary Neuro-Care Centre, South India by H B Veena Kumari, Neurocare Institute, India.

Conference Series is glad to announce “**13th Annual meet on Bacteriology Asia Pacific 2020**” which is scheduled during **August 26-27, 2020** at **Singapore** and the event is enlightened with the theme “**Discovering the New Challenges in the field of Microbiology**”.

The **Bacteriology Asia Pacific 2020** will be hosting presentations based on Epidemiology and Public Health, Reproductive, Perinatal and Pediatric Epidemiology, Sexually Transmitted Diseases, Psychiatric Epidemiology, Cardiovascular Epidemiology, Nutritional Epidemiology and many more.

The Bacteriology Asia Pacific 2020 conference is expected to provide great scope for interaction of professionals including speaker presentations, workshops, poster presentations, symposia from around the globe, on a single platform.

Award editorial:

4th International Conference on Medical & Clinical Microbiology

Conference Series LLC Ltd is going to organize “**13 Annual meet on Bacteriology Asia Pacific 2020** during **August 26-27, 2020** at **Singapore**” (**Bacteriology Asia Pacific 2020**) with the theme “**Discovering the New Challenges in the field of Microbiology**”.

Bacteriology Asia Pacific 2020 is an global event where experts will be delivering and presenting their advanced and innovative research on the topics such as Maternal, Infant and Child Health, Adolescent Health, Reproductive Medicine & Women Health, Healthcare Associated Diseases, Epidemiology and chronic diseases, Sexually Transmitted Diseases, Epidemiology and Cancers, Diabetes & Public Health, Obesity & Public Health, Epidemiology and Oral Health, Public Health Nursing.

We cordially invite all the speakers and delegates from around the world to Bacteriology Asia Pacific 2020 conference which includes keynote introductions, Oral talks, Poster presentation and Exhibitions. Companies related to Medical and health care are also invited to display their products at the conference venue.

Bacteriology Asia Pacific 2020 offers emerging scholar awards to the outstanding researchers, exceptional graduates or early academicians who have distinctive enthralment towards the conference themes.
