

## 2020 Awards for Astronomy and Space Technology Conference

**Areg Mickaelian**

Director, Byurakan Astrophysical Observatory, Extragalactic Astronomy, Byurakan, Armenia. E-mail: aregmick@yahoo.com

Astronomy is one amongst the oldest fields of science. It deals with the study of the Universe and of the objects like sun, moon, stars, planets, comets, gas, galaxies, gas, dirt and alternative non-earthly bodies. It's additionally a multidisciplinary subject that deals with the study of science with physics, chemistry, arithmetic, engineering science, earth science and biology. Astronomy is essentially a data-based science instead of an experimental one. The discussions and interpretation of observations use the utilization of mathematical analysis, usually of the foremost advanced kind.

Space technology is developed by space science or the region business to be used in area flight, satellites or space exploration. Space technology includes satellites, space stations, support infrastructure, equipment, and procedures. Space is such a unique atmosphere that trying to figure in it needs new tools and techniques. Many common everyday services similar to meteorology, remote sensing, GPS systems, television system, and a few long-distance communications systems critically deem area infrastructure.

The [Astronomy 2020](#) is an event that aims to explore the ways to innovate in the field of space science, and to find new research developments on space exploration in Berlin, Germany on May 20-21, 2020. The conference will serve as a platform to bring together leading scientists with different specialties such as astronomy, space technology and aerospace industry etc. Astronomy Congress will discuss on the topics such as [Astrophysics](#), Astrochemistry, Astrobiology, Cosmology, Galactic Astronomy, Orbital Mechanics, Planetary Science, Solar Astronomy, Space Technologies, Space Weather, Electromagnetic Radiation and Aerospace Engineering.

Conference Series LLC fosters research excellence and leadership by recognizing the outstanding researchers, exceptional graduates or early academicians who have distinctive enthrallment towards the conference themes. Nominees are judged on past accomplishments, research excellence and outstanding academic achievements. Researchers throughout the world who have been credited with outstanding achievements can make a significant contribution to the advancement of their field, thereby having a positive influence on the society.

To provide a strong professional development opportunity for early career academicians-meeting experts awards in different

categories are announced such as **Expert Level** which will be presented to the expert researchers who have done exceptional work in the field of [Astronomy and Space Technology](#). The award is considered the most distinguished award for who is passionate towards their work, willing to innovate and accept the aberrations happening in the research area with the introduction of recent trends. Followed by **Professional Level** which is termed as The Research Contribution Award for who should be hard working, diligent, focused and devoted to the specific field of interest. Next is the **Scholar Level** which will be presented to upcoming researchers and scientists in their respective field ([Astronomy and Space Technology](#)) who bring new technologies and innovations to their work according to the new trends in their field.

To encourage Women scientists and researchers by providing a platform where they can present their work and passion towards their research **Women Scientist Award** will be presented which is also termed as The Women of Science Award. To acknowledge the speakers with great presentation skills, influential research work and long term excellence **Outstanding Speaker Award** will be presented. **Best Keynote Speaker Award** will be presented to the keynote speaker who adds an extraordinary feel to the conference by their distinguished research work, projects and strategies that will provide a new trend in the field of [Astronomy and Space Technology](#).

**Best Poster Presentation** award will be presented to the research design which should be appropriate and transparent. Factual information should be kept separate from interpretations or implications. This award is given to encourage students and recent graduates to present their original research. The one who presents best thesis work will be awarded with **Outstanding Masters/Ph.D./Post Doctorate thesis work** which has been implemented to improve long-term excellence in the field of [Astronomy and Space Technology](#).

These awards are a tribute to the men and women who have contributed to the progress of humanity through their dedication to science. Serving as a source of inspiration, the awards help to raise the profile of talented individuals in addition to the profession as a whole.

Astronomy 2020 supported by the organizing committee network of renowned scientists and professional experts such

as **Areg Mickaelian**, Byurakan Astrophysical Observatory, Armenia, **Sohan Jheeta**, NoR HGT & LUCA UK, it provided a platform for collaboration among colleagues, vendors, and academia to reveal new innovations, solutions, ideas, and emerging technologies in Astronomy.

World Physics Conferences going to be held during January, 2020 to December, 2020 at various cities in Europe (London, Barcelona, Madrid, Valencia, Rome, Milan, Berlin, Frankfurt, Vienna, Zurich, Dublin, Edinburgh.... and Many More...!!)
