Outstanding speaker in Global Innovators Insight 2020

Macchiavello-Macho RA investigated about in relation to the published work "Michelangelo and Noah's Liver: A Hidden Anatomy Lesson?", I have been asked to make a review of the aspects that relate Michelangelo to anatomy. Let me start by asking some questions: Who was Michelangelo?.

Sotirios K has commented through a commentary saying that it has been almost 60 years since the ansa pancreatica was first described by Dawson and Langman in a rather innovative study based on radiographic evaluation of the intrapancreatic ductal configuration in cadaveric subjects. The proposed incidence, based on 120 subjects, was 21%. Undoubtedly a percentage high enough to raise an interest on this anatomic entity. But what does the ansa pancreatica represent?
