

2020 Conference Announcement 16th International Conference on Metabolomics & Systems Biology August 19-20, 2020 | France

Gerald Hsu

Eclair MD Foundation, USA, E-mail: bmgch168@icloud.com

Metabolomics is the large-scale study of small molecules, commonly known as metabolites, within cells, biofluids, tissues or organisms. Collectively, these small molecules and their interactions within a biological system are known as the metabolome. Mass spectrometry-based metabolomics techniques are the most sensitive for simultaneous analysis of many compounds. Interpreting and deriving context from complex metabolomic datasets are highly challenging and represent a major area of research. Metabolomics analyses of biological samples involves getting a metabolic profile using analytical technologies and analyzing the data generated by these platforms to gain insight into the system's metabolic state.

The [Euro Metabolomics 2020](#) is an event that aims to explore the ways to innovate in the field of chemistry, and to find new catalysts for better industrial development at Paris, France on August 19-20, 2020. The conference will serve as a platform to bring together leading chemists with different specialties such as metabolomics, systems biology etc. Euro Metabolomics 2020 will discuss on the topics such as [Metabolomics](#), Biochemistry, Systems Biology, Pharmaco Metabolomics, Metabolomics in Precision Medicine, Metabolomics in Drug Discovery, Metabolomics in various Diseases, Metabolic Modelling and Synthetic Biology and Plant and Environmental Metabolomics.

15th International Conference on Metabolomics and Systems Biology, 2019 was inaugurated followed by the keynote session by Gerald C Hsu, eclairMD Foundation, USA with the title "GH-method: methodology of mathematical medicine." The sessions were Chaired by Gerald C. Hsu, EclairMD Foundation, USA, Xuanxian Peng, Sun Yat-sen University, China and Co-Chaired by Hui Li, Sun Yat-sen University, China, Bo Peng, Sun Yat-sen University, China

The GDP is projected to rise by 2.5 percent in 2019, 1.9 percent in 2020 and 1.8 percent in 2021. The metabolomics industry will be source of strength, with

growth of 2.5 percent in 2019 and 3.0 percent in 2020. In fact, chemical industry growth will exceed that of the US economy through 2024.

Global Biochemistry Conferences going to be held during January 2020 to December 2020 at various cities in Europe (London, Barcelona, Madrid, Valencia, Rome, Milan, Berlin, Frankfurt, Vienna, Zurich, Dublin, Edinburgh.... And Many More....!!!

Linda Grace

Program Manager | Euro Metabolomics 2020
