

## **2020 Conference Announcement of 8th International Conference and Exhibition on Automobile & Mechanical Engineering April 22-23, 2020 Berlin, Germany**

Jianguo Lin

University of Birmingham, UK, E-mail: [jianguolin@imperial.ac.uk](mailto:jianguolin@imperial.ac.uk)

Automotive engineering is a branch of Vehicle Engineering. Automotive engineering, aerospace engineering and naval architecture combined form Vehicle Engineering. The components of mechanical, electrical, electronic, software and safety engineering are applied to the design, manufacture and operation of vehicles and their respective engineering subsystems. It also includes modification of vehicles. Manufacturing sector deals with design and assembling the parts of automobiles. The automotive engineering field is research oriented and involves application of mathematical models and formulae. The study of automotive engineering involves design, development, fabrication and testing vehicles or vehicle components from concept to production.

With the grand success of Automobile Europe 2019, we are glad to announce our next upcoming conference Automobile Europe 2020 at Berlin, Germany on April 22-23, 2020. The conference will serve as a platform to bring together leading Mechanists with different specialties such as Automotive Industry, Mechanical Engineering etc. Automobile Europe 2020 will discuss on the topics such as Noise, vibration, and harshness (NVH) in Automobiles, Braking System and Driver less technology, Global Positioning System and Manufacturing Engineering. Automobile Europe 2020 supported by the organizing committee network of renowned scientific and

professional expert such as Jianguo Lin, University of Birmingham, UK, it provided a platform for collaboration among colleagues, vendors, and academia to reveal new innovations, solutions, ideas, and emerging technologies in Engineering.

The GDP of automobile industry is projected to rise by 3.5 percent. It historically has contributed 3-3.5 percent to the overall GDP. In 2019, Big Data vendors will pocket more than \$3.3 Billion from hardware, software and professional services revenues in the automotive industry. Agriculture, food, and related industries contributed \$1.053 trillion to U.S. GDP in 2018.

Automobile Conferences going to be held during January, 2020 to December, 2020 at various cities in Europe (London, Barcelona, Madrid, Valencia, Rome, Milan, Berlin, Frankfurt, Vienna, Zurich, Dublin, Edinburgh.... and Many More..!!!
