2020 Conference Announcement of Thermodynamics, Heat & Mass Transfer Conference

Catherine Brinson L
Professor, Department of Mechanical Engineering & Materials Science, Duke University, USA, E-mail: cate.brinson@duke.edu

Conference Series LLC Ltd is pleased to welcome everyone to attend our forthcoming conference International Conference on Thermodynamics, Heat & Mass Transfer which is going to place during July 22-23, 2020 in Vancouver, Canada. The meet will focus on the theme “Empirical Evidence for Innovations towards Thermodynamics”.

Six keynote lectures will cover a wide range of topics and a special plenary lecture will be given by a representative of the industrial world. The program will be having several mini symposia, contributed talks and a poster session.

Thermodynamics 2020 will provide right platform for the interaction between the experts around the world. The conference aims in gathering renowned scientists, professors and research professionals across the globe under one roof and organize a healthy discussion so that the researchers and authors can present their work at the conference. The conference will focus on wide range of sessions and Tracks which provides the participants and all the attendees with an opportunity to extend their information in the subject and interact with professionals within the field of Thermodynamics, Heat & Mass Transfer.

Thermodynamics, Heat & Mass Transfer have not only helped the development in different fields in science and technology but also contributed towards the improvement of the quality of human life to a great extent. All this has become possible with the different discoveries and inventions leading to the development of various applications. The core aim of Thermodynamics 2020 is to provide an opportunity for the delegates to meet, interact and exchange new ideas in the various fields of Thermodynamics, Heat & Mass Transfer.

Thermodynamics, Heat & Mass Transfer Conference paves a platform to globalize the research by installing a dialogue between industries and academic organizations and knowledge transfer from research to industry.

Thermodynamics 2020 aims in proclaim knowledge and share new ideas amongst the professionals, industrialists and students from research areas of Thermodynamics, Heat & Mass Transfer to share their research experiences and indulge in interactive discussions and special sessions at the event.

About Venue:
With its scenic views, mild climate, and friendly people, Vancouver is known around the world as both a popular tourist attraction and one of the best places to live. Vancouver is also one of the most ethnically and linguistically diverse cities in Canada with 52 percent of the population speaking a first language other than English.

Vancouver has hosted many international conferences and events, including the 2010 Winter Olympics and 2010 Winter Paralympics.

The City continues to see an excellent return on investments made in the 2010 Winter Games, from sustainable community centres to public art, community involvement, and transportation infrastructure. Vancouver has a moderate, oceanic climate. Protected by the mountains and warmed by the Pacific Ocean currents, Vancouver is one of the warmest cities in Canada.
