### Summary of CAM 2020

[Complementary & Alternative Medicine](#) has been the source of medicinal cures long before recorded history. Over time, people have narrowed down the plants with the desired medicinal properties. Scientists have found that over the same region and even all over the whole world people use similar species of plants for similar medicinal purposes.

The use of medicinal herbs for maintaining health also extends to other areas. Many human cultures across the world have also been utilizing natural ingredients for cosmetic and physical fitness maintenance regimens. The use of herbs for cosmetic certainly predates the use of chemicals. Many cultures around the world adopt their knowledge of medicinal herbs, combined with a mix of cultural beliefs and symbolism, into some of the earliest forms of beauty care.

[CAM 2020](#) works mainly because they contain some chemical ingredients that interact favorably with the human body or immune systems to combat disease. It was only through the advancements of modern scientific method and the disciplines of chemistry and biology did people began to understand what make herbal remedies work. As modern sciences developed, scientists began to study the chemical compositions of traditional herbal medicines. This study, together with modern knowledge of human biology, led to the development of modern pharmaceuticals.

In today's world of high-tech Western medicine, natural medicines have begun a comeback in recent years. In beauty care, the use of herbs and natural, organic substances are also making a huge comeback.
