

3rd Annual Conference on Bacterial, Viral and Infectious Diseases during April 27-28, 2020 at Istanbul, Turkey

Robert O Young

CEO of Miracle Centre, USA, E-mail: phmiracleliving@aol.com

Bacterial Diseases 2020 conference includes current research in the field of Bacteriology, Virology and Infectious Diseases. An exclusive session to discuss the novel technologies and innovative methods in your area of expertise includes Molecular Biology, Microbiology, Pediatric Infectious diseases, Vaccines and so on.

With great pleasure, ME conferences proudly organizing the Conference in the International level which is entitled as 3rd Annual Conference on Bacterial, Viral and Infectious Diseases scheduled during April 27-28, 2020 at Istanbul, Turkey which revolves around the theme Recent investigation and Improving Access in the treatment of infectious diseases.

Bacterial Diseases 2020 aim is to bring together leading academic Scientists, Researchers, Engineers, and Industrialists to share their experiences and research results in their on-going project in the field of Bacteriology, Virology and Infectious Diseases. It is a global platform for researches that afford a new discovery into microbiology, Clinical diagnostics of Bacterial, Viral and Infectious diseases. It also provides a platform to discuss on latest diseases on bacteria and virus. Infections that are prepared to do specifically or in a roundabout way actuating tumor arrangement. Coordinate tumor development may come about because of vaccination of living cells with tumorigenic infections. Viruses play a role in the development of cancer due to genetic changes. The viruses and cancer are known as tumor viruses or oncogenic viruses. The frequency of human cancer can be reduced vaccinating against the viruses or therapeutically by testing the infections.

In Bacterial Diseases 2019 Dr Robert O Young presented a keynote speech on Cystic Fibrosis and Pulmonary Adenocarcinoma Lung Cancer both Metabolic and Dietary Acidic conditions of the Interstitial Fluids of the Interstitium which gave us a detailed analysis in the lung cancer issues. The Keynote speech was given by Dr Ayman Noreddin on the topic Bacterial Resistance: Public Health Encounter in which he explained about the resistivity of the bacterial species and how they are harmful to the humans.

The elaborated information of the above topics had been discussed in the "2nd Annual Conference on Bacterial, Viral and Infectious Diseases". ME Conference is glad to schedule the 3rd Annual Conference on Bacterial, Viral and Infectious Diseases which is going to be held on April 27-28, 2020 at Istanbul, Turkey.
