

## 49th World Congress on Microbiology 2020 June 15-16, 2020 | London, UK

**Marie Therese Giudici-Ortoni**

*Director, Mediterranean Institute of Microbiology, France, E-mail: giudici@imm.cnrs.fr*

Microbiology is a study of microscopic organisms, such as bacteria, viruses, archaea, fungi and protozoa. This field includes basic research on biochemistry, anatomy, cell biology, ecology, evolution and medical aspects of microorganisms, including host reaction to these agents. The nature of microorganisms has been speculated for many years before their actual discovery. The presence of unseen microbiological life was postulated by Jainism, based on the teachings of Mahavira as early as the 6th century BC. The Roman Marcus Terentius Varro refers to microbes when he warned against locating a home in the vicinity of swamps' because there are bred some tiny creatures that cannot be seen by the eyes, which float in the air and enter the body through the mouth and nose, causing serious diseases.

Microbiology 2020 is a unique and exciting opportunity, have been designed in an interdisciplinary manner with a multitude of tracks to showcase the new technology, the new products, the service your industry may bid to a broad international audience. It covers a lot of topics and it will be a nice platform to showcase their recent researches on Microbiology Applications.

The Microbiology 2020 is an event that aims to explore the ways to innovate in the field of microbiology and emerging issues in the field of microbiology, at London, UK on June 15-16, 2020. The conference will serve as a platform to bring together leading Microbiologists. World Congress on Microbiology will discuss on the topics such as Bacteriology, Bacterial Pathogens & Associated

diseases, Mycology Virology, Medical Parasitology, Antimicrobial Agents, Clinical Infections and Vaccines, Molecular Microbiology, Food Microbiology and Veterinary Microbiology.

Microbiology 2020 supported by the organizing committee network of renowned scientific and professional expert such as Cesira Giordano, Director, University of Pisa, Italy, Marie Thérèse Giudici-Ortoni, Director, Mediterranean Institute of Microbiology, France, Burton M Altura Professor, SUNY Downstate Medical Center, USA, Esther Orozco Professor, Center for Research and Advanced Studies, Mexico. It provided a platform for collaboration among colleagues, vendors, and academia to reveal new innovations, solutions, ideas, and emerging issues in Microbiology.

The Global Clinical Microbiology Market is relied upon to reach USD 4.95 billion by 2023 from USD 3.63 billion out of 2018, developing at a CAGR of 6.4%. "Microbiology Testing/Clinical Microbiology Market has its applications in (Pharma, Clinical, Manufacturing, Environment)

Disease (Respiratory Disease, STD, UTI), Product (Instrument, Analyzer, Reagent), End User (Hospital, Diagnolab, Academia) and Global Forecast to 2023."

Global Microbiology Conferences going to be held during January 2020 to December 2020 at various cities in Europe (London, Barcelona, Madrid, Valencia, Rome, Milan, Berlin, Frankfurt, Vienna, Zurich, Dublin, Edinburgh.... And Many More...!!!
