

## 6<sup>th</sup> Global Experts Meeting on Parkinsons and Movement Disorders October 21-22, 2020 Webinar

### Editorial Note

We had a huge success with the completion of **6<sup>th</sup> Global Experts Meeting on Parkinsons and Movement Disorders Webinar** on October 21-22, 2020. The significance of the meeting was achieved due to the accumulation of all the related group of spectators of research scientists to share their Knowledge, Research work, Technologies, and furthermore trade of worldwide Information towards the correct crowd at ideal time. Congress has received a generous response from all over the world. This has been organized with the aim of endorsing the development of new perceptions and ideas for investigating the high level of knowledge reached by scientific community in the field of Neuroscience.

The conference was organized around the theme "*Novel insights of Clinical Perspectives in the treatment of Parkinsons and Movement disorders*". The congress entrenched a firm relation of future strategies in the field of Neurosciences.

We would like to thank each and every participant of Euro Parkinsons 2020 webinar to make this a huge success. And special thanks to media partners for the promotion of our event.

The **ConferenceSeries** Neuroscience Conferences aim to bring together the prominent researchers academic scientists, and research scholars to exchange and share their experiences on all aspects of Neurosciences. It is conjointly a knowledge domain platform for researchers, practitioners and educators to gift and discuss the foremost recent advances, trends, and issues in addition as sensible challenges and solutions adopted in the fields of Neurosciences.

Parkinson's disease is a dynamic neurological disorder that influences how the individual moves, including how they talk and compose. This disease is caused by low dopamine levels. Various useful treatments, utilizing therapies (physiotherapy), surgery and medications have recognized neurological disorders and changes in the patient group. People with Parkinson's disease also experience stiffness and they find abnormality in carrying out the movements as rapidly as before- this is known as bradykinesia. Parkinson's disease market in US is expected to grow at a rate of 5.3% from sales of \$1.1 billion in 2012 to \$1.3 billion in 2022. Approximately 1 million adults in Asia are suffering from Parkinson's disease, from where 60,000 were diagnosed annually. An estimated of 30%-50% of PD patients mainly suffering from depression. United States is in the fourth position in considering the death of people due to Parkinson's disease. African Americans have the highest death rate of 66.4% followed by whites of 64.6%, Hispanic with 55.4% and Asians with 50.8%. Parkinson's disease strikes 50% more men than women. The economic burden of Parkinson's disease on patients and their families in the Asia is about \$9.4 billion.
