

6th International Conference on Physics scheduled on June 15-16, 2020 at Barcelona, Spain

Ephraim Suhir

*Department of Applied and Mathematical Physics, Portland State University, USA
E-mail: suhire@aol.com*

Physics is that the study of physics for a sensible purpose, as hostile physics motivated exclusively for an improved elementary understanding. This includes technological advances like the event of physics, photonics and device physics, or rising sensible investigations, like experimental physics and experimental high-energy physics. Physicists may have an interest within the use of physics for research project. As an example, the sector of accelerator physics will contribute to analysis in theoretical physics by operating with engineers enabling style and construction of high-energy colliders.

The Physics 2020 is an occurrence that aims to explore the ways in which to pioneer within the field of [Physics](#), and to seek out new Scientists for higher industrial development at London, Great Britain on March 27-28, 2020. The conference can function a platform to pile up leading Scientists with totally different specialties like astronomy, Optics etc. European Physics Congress can discuss on the topics like Spintronics, Geophysics, conductor, and Condensed matter physics, Photonics, physics and Magnetism.

European Physics Congress 2020 supported by the organizing committee network of renowned scientific and professional expert such as Ephraim Suhir, Portland State University, USA, Vladimir V. Romyantsev, A.A. Galkin Donetsk Institute for Physics and Engineering, Ukraine, Vasily Yu. Belashov, Kazan Federal University, Russia, Qiu He Peng, Nanjing University, China, Gilbert Lonzarich, University of Cambridge, Uk it provided a platform for collaboration among colleagues, vendors, and academia to reveal new innovations, solutions, ideas, and emerging technologies in Physics.

A new report shows the many roles of physics, that contributed AN calculable \$2.3 trillion (12.6 % of U.S. GDP) in 2016 alone. Industrial physics encompasses the applying of physics information and principles to the planning and manufacture of product and services.

Global Physics Conferences going to be held during January 2020 to December, 2020 at various cities in Europe (London, Barcelona, Madrid, Valencia, Rome, Milan, Berlin, Frankfurt, Vienna, Zurich, Dublin, Edinburgh.... And Many More!!!!

Annie Williams

Program Manager | Physics 2020
