

8th Global Meet on Wireless and Satellite Communications

Abstract

"Wireless and Satellite Communications will be held in Munich, Germany during May 21-22, 2021. Major attractions of this event would revolve around keynote presentations, oral presentations and poster presentations. This year we are focusing on the theme "Future of Communication in Today's World". The term "Wireless" is progressively utilized as an equivalent word for Additive Communication. The aim of this conference is to learn and share knowledge on Wireless Technologies. This Conference provides a forum for exchange of ideas and authoritative views by leading scientists as well as business leaders and investors in this exciting field. Outstanding keynote speakers and well known leading scientists and experts from around the globe will be expected to share their knowledge. We welcome papers describing advanced prototypes, systems, tools and techniques as well as general survey papers indicating future directions are also encouraged. The papers will be reviewed by the Technical Committee on the basis of originality, quality, and relevance to the conference themes. The conference program will include both oral and poster presentations.

The evolution of wireless technology has conveyed various advancements with its practical features. Remote or Wireless Communication is the fastest developing and most vigorous innovative areas in the communication field. Wireless communication incorporates a wide extent of advancements, technologies, services, and applications that have seemed to meet the specific needs of clients in various deployment scenarios.

Featuring the latest developments in Engineering and Technology, we are glad to announce the Wireless Communications 2021 conference entitled 8th Global Meet on Wireless and Satellite Communications which is scheduled on May 17-18, 2021 at Munich, Germany. We live in a World of communications and Technology in particular is a key part of our lives. The commonly used Wireless Communication Systems in our day – to – day life are: Mobile Phones, GPS Receivers, Remote Controls, Bluetooth Audio and Wi-Fi etc.

Networking in International conferences is committed to driving development in almost every part of communications. Each year, around 3,000 researchers submit proposals for presentations, networking and program sessions will be held at the yearly meetings. After extensive peer review, the best of the proposals are chosen for the conference program, which incorporates oral and poster presentations, symposiums, technical papers, tutorials, workshops, special sessions, and industry sessions designed explicitly to propel technologies, systems and infrastructure that are proceeding to reshape the world and provide all clients with access to an remarkable spectrum of high-speed, seamless and cost-effective global tele, wireless, digital and satellite communication services.

Open Access Initiative is committed to make genuine and reliable contributions to the scientific community without restricting the access of published content. This publisher hosts over 700+ leading-edge peer reviewed Open Access Journals and organizes over 3000 International Conferences all over the world. Obtained enormous global visibility and tremendous response from the authors and readers from all over the world inspired the publisher to maintain reputed Open Access Journals in various scientific disciplines. The journals have over 15 million readers and the reputation and success earned can be attributed to the strong Editorial Board which contains over 50,000 eminent personalities that ensure a rapid, qualitative and quick review process. More than 1000 International Societies are supporting in making scientific information Open Access. International Conferences are rendering perfect platform for global networking for the renowned speakers and scientists across the globe through a most exciting and memorable scientific event filled with much enlightening interactive sessions, world class exhibitions and poster presentations.

The research report on Global Wireless Communication Market 2019 keenly analyses significant features of the industry. The analysis servers market size, latest trends, drivers, threats, opportunities, as well as key market segments. It is based on past data and present market needs. Also, involve distinct business approaches accepted by the decision makers. That intensifies growth and makes a remarkable stand in the industry. The Wireless Communication market will grow with a significant CAGR between 2019 to 2028. The report segregates the complete market on the basis of key players, geographical areas, and segments. Wireless communication refers to the communication or transmission of information over a distance without requiring wires, cables or any other electrical conductors. Wireless communication is one of the fastest growing industries in the business world as it is helpful in sending and receiving messages through electronic devices and a wireless medium.

Key highlighting Sessions: Communication Technologies, Wireless Communication, Satellite Communication, Aerospace, Artificial Intelligence, 5G and Beyond, Communication Theory, Future of 3D printing, Antennas, Mobile Software and Services, Green Communication, Mobile Satellite Communication Networks

In 2020 we had successfully "Wireless and Satellite Communication" during May 21-22, in London, UK with 6 Organizing Committee Members and 30 Renowned Speakers. Our key note speakers were Miroslav Piska from Czech Republic, Soshu Kirihara from Japan, José L Ocaña from Spain. Communication Technologies, Wireless Communication, Satellite Communication, Aerospace, Artificial Intelligence, 5G and Beyond, Communication Theory, Future of 3D printing, Antennas, Mobile Software and Services, Green Communication, Mobile Satellite Communication Networks.

Your rejoinder is our inspiration; keeping this motto in our mind we would happy to welcome you at our upcoming International Conference on Wireless and Satellite Communication will be held in May 21-22, 2021 Paris, France.
