

## Conference Announcement on 2nd International Conference on Automation and Artificial Intelligence London, UK | May 21-22, 2020 | London, UK | May 21-22, 2021

We are satisfied to invite you to the " 2nd International Conference on Automation and Artificial Intelligence London, UK | May 21-22, 2021 ". after the fruitful culmination of the arrangement of Artificial Intelligence Congress. The congress is planned to occur in the excellent city of Las Vegas, USA, on March 26-27, 2021.

This Artificial Intelligence 2021 gathering will give you an excellent research understanding and tremendous thoughts. This conference will also present the advanced research, advanced techniques for Automation and Artificial Intelligence and its related fields.

Artificial Intelligence 2021 will concentrate on the subject Innovations and headways in Artificial Intelligence. We are certain that you will appreciate the Scientific Program of this up and coming Conference. The point of view of the artificial Intelligence Conference is to set up cutting edge research to assist individuals with seeing how procedures have progressed and how the field has created as of late.

Artificial Intelligence 2021 is an area of programming building that underscores the creation of canny machines that work and react like individuals. Man-made brainpower is master in examining how human cerebrum thinks, learn, choose, and work while attempting to take care of an issue, and afterward utilizing the results of this investigation as in the reality, the information has some unfortunate properties. In the advanced world, Artificial Intelligence can be utilized from multiple points of view to control robots, Sensors, actuators and so forth. A robotization framework is a framework that controls and shows building association. These frameworks can be set up in a couple of commonplace ways. In this portion, a general development outline work for a structure with complex prerequisites because of the activity, for example, a counselling room will be depicted.

Conference will encourage [Young Researcher's Forum](#), scientists and the researchers in their early stage of career graph to widely discuss their outcome so as to enrich and develop the idea. The 'Best Poster Award' is meant to encourage students in taking active part in the International Science platform to sharpen their skills and knowledgebase.

Rising Venture Capital Investments Coupled With Increasing R&D Activities in Autonomous Vehicles Market to Drive Artificial Intelligence Market in US Through 2021

According to TechSci Research report, "United States Artificial Intelligence Market, By Application, By Region, By End User Competition Forecast & Opportunities, 2011-2021", the artificial intelligence market in the US is projected to grow at a CAGR of 75% during 2016 - 2021 on account of growing artificial intelligence technology adoption in consumer electronic devices, research and developmental activities in healthcare industry, unmanned aerial vehicles, autonomous cars, etc.

This research evaluates enterprise robotics in the United States including companies, technologies, and solutions across industry verticals and applications. The report includes forecasts by industry vertical/application for 2017through2021.

**Artificial Intelligence (AI)**  
Percentage of Patent References from 1997 to 2017

Leading industry verticals are beginning to see improved operational efficiency through the introduction of robotics and Artificial Intelligence (AI). Robotics investment in many industries represents a substantial capital expenditure with the potential to dramatically reduce operational expenses through resource optimization, quality improvement, and waste reduction.

Robotics in business will accelerate as less expensive hardware and improvements in AI lead to improved cost structures and increased integration with enterprise software systems respectively. The massive amount of data generated by robotics will create opportunities for data analytics and AI-enabled decision support systems. Emerging areas for enterprise robotics include Robotics as a Service, Cloud Robotics, and General Purpose Robotics.

The Sponsor in the Artificial Intelligence 2021 can reach and get exposure to new clients, customer, business, brand awareness and media exposure. The

sponsorship has different levels Premium Sponsorship Packages: Elite Sponsor, Silver Sponsor, Gold Sponsor, Exhibition, Additional Sponsorship Packages and Advertisements. Artificial Intelligence 2021 gathering is and furthermore Video Presentation by specialists.

likewise involved Best Post Awards, Best Oral

Presentation Awards, Young Researchers Forums (YRF)

We are happy to invite all of you to join and enrol for the "2nd International Conference on Automation and Artificial Intelligence London, UK " which will be held during March 21-22, 2021. Individuals who have missed going to the past gathering are generally free to show your examination thoughts at the 2021 Artificial Intelligence meeting. This meeting will assist you with improving systems administration with famous individuals in the field of transplantation
