

Announcement on Biomaterials 2020 scheduled on May 25-26, 2020 at Rome, Italy

Gianfranco Peluso

Director, Italian National Research Council, Rome, Italy, E-mail: gianfranco.peluso@cnr.it

Biomaterials improve the quality of life for an ever increasing number of people every year. Emerging technological advancements in the research has led to an outbreak in the availability and diverse range of biomaterials. Accompanying these new materials, medical sciences have seen a long history of biomaterials. “Any matter, surface that interacts with biological systems” is known as a biomaterial. Biomaterials are defined mostly by their application of being integrated with the body, either for diagnostic or therapeutic applications. They can be artificially synthesized or derived from natural sources, and be made up of metallic, polymeric, **ceramic**, or a composite of such materials. While biomaterials are moving forward at an exponential rate, they are currently used across a wide range of applications.

Biomaterials 2019 witnessed an amalgamation of peerless speakers who enlightened the crowd with their knowledge and confabulated on various new-fangled topics related to the field of Biomaterials namely **Gianfranco Peluso IRECT-CNR, Italy** provided a platform for collaboration among colleagues, vendors, and academia to reveal new innovations, solutions, ideas, and emerging technologies in biomaterials.

With the success of Biomaterials 2019, we are glad to announce our next upcoming conference Biomaterials 2020 at **Rome, Italy** on **May 25-26, 2020**. The conference will serve as a platform to bring together leading specialists in the field. Biomaterials 2020 will discuss on the topics such as **Advanced Biomaterials**, Polymer Biomaterials, Dental Biomaterials, Biomaterials and

Nanotechnology, **3D Printing** of Biomaterials, Biodegradable Biomaterials, Biomaterials in Delivery Systems, Biophotonics and Biomedical Optics, Bio-based Materials and Sustainability, **Tissue Engineering** and **Regenerative Medicine**, Bio-Nanomaterials, Biomaterials Applications, Biomaterials Companies and Market Analysis.

The biomaterials market is expected to reach USD 149.17 Billion by 2021 from an estimated USD 70.90 Billion in 2016, at a CAGR of 16.0%. The growth of the overall biomaterials market can be ascribed to enlarged funds & grants by government bodies worldwide, the growing implantable devices market, technological progressions, increasing number of hip and knee replacement procedures, and high growth in geriatric population coupled with increasing incidence of cardiovascular diseases.

Global **Biomaterials Conferences** going to be held during January, 2020 to December, 2020 at various cities in Europe (London, Barcelona, Madrid, Valencia, Rome, Milan, Berlin, Frankfurt, Vienna, Zurich, Dublin, Edinburg and More...!!!
