### Abstract

The post report of Annual Congress on Cancer Nursing and Oncology captures a programme of keynote presentations, oral talks, panel discussions and shared dialogue at the conference on leading the way in Medical and Health Science, which took place from 30th of July 2020.

Cancer Nursing Webinar brought together doctors, physicians, nurses, oncologists, professors, chief officials, entrepreneurs, researchers and also provided a treasurable networking opportunity and set the stage for more cooperation among doctors from countries at different stages of development.

The webinar began with opening remarks of the conference host and continued with a set of keynote presentations of real world cases describing new and remarkable initiatives by the distinguished keynote speakers.

A series of stimulating speeches to create skills in and advance awareness of requirements in cancer care was of particular interest to industry and academia. The speakers addressed topics as well as taking a look into an ambiguous future through the senses of a futurologist.

Based on the theme the conference program addressed leading approaches and provided an opportunity to discuss and challenge some up-to-date practices.

Many participants have contributed in so many ways to turn this event into a smoothly running meeting with very interesting presentations and posters and a very good atmosphere for intensive networking.

We would like to thank all the attendees, media partners for all their great scientific input and for many fruitful discussions and scientific interaction. And it is reasonable to conclude that the conference was a great success!
