This is a historic material archive for a time-line and plot analysis! Are we talking about a set of related "cosmic" events at a historic plot? Was the historic Exodus route a visit to the Jebel el Lawz site at Mt Sinai? Among the many questions of the Book of Exodus, which path did they exactly take and why some historic archives are absent? Was the Exodus underwater sand bridge of the Red Sea constructed for a fact? Practically talking, the river bed can't run to the other side of the Red Sea..?! If Suez was about 20 km from the Red Sea crossing, then why did they pass further from the habitat Suez areas of Egypt? [1-4] (Figures 1-8)*.
