

## Award Announcement for 14th International Conference & Exhibition on Biosensors & Bioelectronics, September 25-26, 2020 | Montreal, Canada

Mahmoud Almasri

Associate Professor, Department of Electrical Engineering and Computer Science, University of Missouri, Columbia, USA, E-mail: [almasrim@missouri.edu](mailto:almasrim@missouri.edu)

[Biosensors and Bioelectronics 2020](#) Organizing Committee, is a great pleasure and an honor to extend you a warm invitation to attend 14th International Conference and Exhibition on Biosensors & Bioelectronics during **September 25-26, 2020** in **Montreal, Canada** with the theme "Future trends development and new intervention in biosensors technologies".

[Biosensors and Bioelectronics 2020](#) conference explores new advances and recent updated technologies. It is your high eminence that you enhance your research work in this field. Biosensors conference deals with recent advances in the field of biosensors like security and sensing, photonic sensor technologies, Biosensors for imaging and many more. Biosensors congress provides a unique platform for people who conduct their research work in this field. The conference captivates individuals both from commercial and academic worlds yet establishes a firm link and binds us together with the recent updated accomplishments. We provide a good opportunity by admiring your updated research knowledge and also by publishing it in our respective Journals. The congress ultimately provides a good gathering of bright personalities to update us the new research on Biosensors.

### Research Contribution and Achievement

The academic & business conference acknowledges those participants and organizations that have remarkably added to the value to scientific communities. Awards provide an opportunity to the participants like outstanding researchers, exceptional graduates or early academicians and organizations to showcase their best research and projects to the world related to the conference theme. It also recognizes who have collectively made unique and significant contributions to the scientific community related to the conference theme. It also provide platform to professional networking with researchers of similar interest from others part of the world and also encourage the participants in taking active

part in the International Science and Technology platform to enhance their skills and knowledgebase.

### Call for Nominations

#### Expert Level (Scientific Service Achievement Award)

The Achievement award is designed to recognize sustained, exceptional performance and/or significant contributions of the individuals who have made splendid contributions in [Biosensors & Bioelectronics](#). **Scientific Service Achievement Award** is one of the most distinguished awards in the conference. The applicants should have minimum of **20+ years** of experience in the relative field including performance or project goals above and beyond normal performance expectations in public or private sector. The applicants are expected to have a highly committed passion and should take lead in researching the current trends and developments towards the related subjects. The applicants can be nominated through online.

#### Professional Level (The Research Contribution Award)

The Research Contribution Award aims to recognized renowned professional for their excellence in research in the area of Biosensors & Bioelectronics to the advancement of knowledge in their own fields with significant impact on public or private sector. The applicants should have 10+ years in area of Biosensors with their outstanding achievements. Part-time research experience would be counted as pro-rata. It is calculated starting from the date when you obtained the (first) degree entitling you to embark on a doctorate (either in the country in which the degree was obtained or in the country in which the researcher is recruited), even if a doctorate was never started or envisaged. The applicants can be nominated through online.

#### Scholar Level (The Upcoming Researcher Award)

Applicants must be upcoming scientist, researchers and experts who possess 10+ years of expertise in the area of

[Biosensors & Bioelectronics](#). The purpose of these awards is to inspire promising participants to expand their network by widely discussing their research advances and their outcome. Presentation includes 25-30 minutes of oral talk on the scientific research topics based on the theme of the conference along with 5 minutes panel discussions. The applicants can be nominated through online.

#### **Women Scientist (The Women of Science Award)**

Women in Science Award highlight major contributions by female scientists to the science and technology sector. Winners of the award are inspiring role models for future generations of women in science. Through this conference, a launch pad is provided for Women Scientist for presenting their research advances in the area of Biosensors & Bioelectronics. As a part of encouragement to women scientist's participants, awards and assistantship for women scholars in career development and research guidance through our collaborations will be given. We cordially invite women scholars and scientists from Universities/ Industries to who have 10+ years of research experience to join the forum. The applicants can be nominated through online.

#### **Outstanding Speaker in Biosensors & Bioelectronics 2020**

The conference offers awards to the best Outstanding Speaker based on the scientific content and quality of presentation. The aim of the awards is to support research activities in the field of Biosensors & Bioelectronics research and to identify the marvellous work by the participants for presenting their projects, strategies, and schemes that have been implemented to improve long-term excellence in Biosensors & Bioelectronics. The applicants can be nominated through online.

#### **Best Keynote Speaker in Biosensors & Bioelectronics 2020**

This recognition celebrates the most inspiring and effective presentations that are delivered by impactful, confident and engaging speakers. The Awards will be given to the speaker who has made significant contributions advances in their projects, strategies, and schemes and successfully implemented to improve long-term excellence in Biosensors & Bioelectronics. The deserving applicants can be nominated through online.

#### **Best Poster Presentation in Biosensors & Bioelectronics 2020**

In order to identify best poster presentation from the poster session, student poster competition is organized at Conference. Award should motivate participants to strive to realize their full potential which could in turn be beneficial to the field as whole. This award will be provided to participants like student and recent graduates to present their original real-time work and share their views and aspects related to the theme of the conference. All accepted abstracts will be presented at the poster sessions during the conference. The deserving applicants can be nominated through online.

#### **Outstanding Masters/Ph.D./Post Doctorate thesis work Presentation in Biosensors & Bioelectronics 2020**

The aim of this Award is to inspire, to identify the marvellous work and bring together the participants such as Master/ Ph.D./Post Doctorate and to in the area of [Biosensors & Bioelectronics](#). The award is offered based upon an absolute standard excellence and all student presenters will be consider eligible for the award. The deserving applicants can be nominated through online.
