

Award Content for Clinical Research 2020 Conference

Yavuz Selim Silay

Chairman, Istanbul Consulting Group, Turkey E-mail: info@icg.ist

Research in which people, or data or samples of tissue from people, are studied to understand health and disease. [Clinical research](#) helps find new and better ways to detect, diagnose, treat, and prevent disease. Types of clinical research include clinical trials, which test new treatments for a disease, and natural history studies, which collect health information to understand how a disease develops and progresses over time. A clinical study involves research using human volunteers (also called participants) that is intended to add to medical knowledge. There are two main types of clinical studies: clinical trials (also called interventional studies) and observational studies. ClinicalTrials.gov includes both interventional and observational studies. Clinical research refers to all research carried out on humans (healthy or sick people). It focuses on improving knowledge of diseases, developing diagnostic methods and new treatments or medical devices to ensure better patient care.

Expert Level (Scientific Service Achievement Award)

The Achievement award is designed to recognize sustained, exceptional performance and/or significant contributions of the individuals who have made splendid contributions in Clinical Research **Scientific Service Achievement Award** is one of the most distinguished awards in the conference.
