Shahid Beheshti University of Medical Sciences, Tehran, Iran

## Editorial

As the title indicates, our view of Antibiotics is based on the premise that CRE, carbapenem-resistant bacteria family, may be a nightmare strain of microorganism that may resist all antibiotics, kill a high proportion of the folks it infects and spread easily. We invite all the participants throughout the world to join us for the upcoming "2nd Annual Congress on Antibiotics and Antimicrobial Resistance" presented in Geneva, Switzerland, during July 09-10, 2020 will address this topic, presenting by speakers from all over the world as announced in an earlier editorial. Working with the theme: Antibiotics and Antimicrobial Resistance Awareness and New Innovations.

As Antibiotics Resistance 2019 was successful event, Antibiotics Resistance Conference Series LLC Ltd. would like to continue the quality content by participants from antibiotics support organizations; board certified behaviour analysts; clinical & school psychologists; clinicians, therapist & counselor's; academics & researchers; social workers; early childhood services; speech language pathologists; individuals with antibiotics spectrum; doctors, nurses; physician assistants; occupational therapists; parents, family members, caregivers, advocates; general educators; special educators; education consultants; employment services; transition to work and post school providers; paraprofessionals; policy makers (government & nongovernment); pupil service directors; superintendents; adult service providers; transition coordinators; clinical practice managers by announcing the awards for the upcoming antibiotics resistance 2020 meeting.
