

Cancer Pandemic and Cancer Clinical Trails

Mari Uyeda*

Department of Oncology, Hospital of Speciality of Rabat, University, Sao Paulo, Brazil

Journal of Cancer Clinical Trials, JCCT is a remarkable journal that serves as a forum for high-impact research. As a result, the journal is about Cancer which is a group of diseases results in abnormal cell growth with the ability to invade or spread to other parts of the body and Cancer Clinical trials are research studies carried out on human volunteers to test the efficacy of a new drug or procedures. These studies are mainly conducted to prevent, detect or treat cancer. JCCT is in an ideal position to play a leading role in next generation of cancer and clinical research. Building on the outstanding leadership of the previous Editors-in-Chief and its unique and valuable contribution to the field of cancer clinical research, the current transition in leadership provides the opportunity for new directions and goals to ensure the continued success of JCCT in the coming years.

The mission and scope of JCCT is to publish original research on all types of cancer clinical trials, including cancer clinical trials, including breast cancer, lung cancer, ovarian cancer, liver cancer, bladder cancer, prostate cancer, blood cancer, colon cancer, cervical cancer, skin cancer, oesophageal cancer, kidney cancer, brain cancer, metastatic breast cancer, osteosarcoma, oncology, cancer clinical trials and ethical issues, glioblastoma, cancer clinical trials management, etc. The Journal plays an important role in the digital advertising of the articles, research papers, etc. to help the authors increase the number of viewers effectively. It also tries its level best to maintain the ethics and publish the work with utmost quality. Through various social networking sites like Face book, Twitter, Linked In, it shares the latest information related to the Journal.

The Journal plays an important role in the digital advertising of the articles, research papers, etc. to help the authors increase the number of viewers effectively. It also tries its level best to maintain the ethics and publish the work with utmost quality. Through various social networking sites like Face book, Twitter, Linked In, it shares the latest information related to the Journal. It is creating an interest for the authors to visit our journal, submit their research papers and boosts up their research oriented studies. It gives the academicians, students, researchers, medical professionals, industries associated with clinical trials and diagnosis etc. free access to the journal. It values the contribution of the author and helps in generating excellent profile sites for them.

I thank all the cancer specialist, oncology specialist and researchers who are fighting their life to treat the pandemic cancer diseases and all medical advisors, writers for making the experimental demonstration into a written document. I appreciate all the Editors and reviewers of the Journal who has stepped up and made the journal a success. I hope this support will be continued by all of them and maintain the standard of the Journal.
